TECHNICAL SKILLS

Languages: C++ [Advanced] | Java [Intermediate] | JavaScript | Python [Basic] | Dart

Frontend: React.js | Next.js | HTML5 | CSS3 | Tailwind CSS | Vite

Backend: Node.js | Express.js | REST APIs | Next.js App Router

Databases: PostgreSQL | MongoDB | Prisma ORM | Neon

Tools & Technologies: Git | GitHub | Docker | Docker Compose | Postman | Zustand | Zod | Jest | React Testing Library | Socket.IO | NextAuth/Auth.js | JWT | OAuth | Vercel | Netlify | MDX

PERSONAL STATEMENT

Computer Science undergraduate pursuing Software Product Engineering with hands-on experience in full-stack development, frontend engineering, backend architecture, and production deployment. Strong in C++, Java, JavaScript, React, Next.js, Node.js, TypeScript, and PostgreSQL, with practical experience in system design, authentication, database design, testing, and performance optimization. Seeking software engineering internships to contribute to reliable products and grow through real-world engineering work

EXPERIENCE

Web Developer | Painganga Publication

Nov 2024 – June 2026

- Managed and maintained two production publication platforms, [Shabdsanchay Journal](#) and [M.A.R.G.](#) supporting paper submissions, issue publishing, certificate downloads, and researcher interactions.
- Applied Wix Studio, WordPress, HTML, CSS, JavaScript, Hostinger, SEO, and custom workflows across UI implementation, deployment, troubleshooting, and digital publishing operations.
- Supported 100+ monthly visits and 20-30 active users across workflows spanning 15+ journal issues and hundreds of research publications.

PROJECTS

Cubit- Open-Source Full-Stack Speedcubing Platform | [Github](#) | [Live Deployment](#)

- Stack:** React, Vite, JavaScript, Tailwind CSS, Zustand, Node.js, Express, PostgreSQL, Prisma, Socket.IO, MDX
- Architected and engineered the platform end-to-end, combining a precision timer, analytics, sessions, progress tracking, Trainer, gamification, leaderboards, community, friendships, and real-time social features.
- Engineered a deterministic 2x2-5x5 cube-state engine supporting WCA-style notation, algorithm execution, visualization, and reusable interactive components; extracted the core into the open-source Cubit.js npm package.
- Integrated authentication, social/community systems, rating and streak progression, Socket.IO notifications, and automated testing; validated algorithms, production builds, and Trainer functionality

SlotTrack - Full-Stack Fitness Class Booking Platform | [Github](#) | [Live Deployment](#)

- Stack:** Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, Zod, Auth.js, Docker
- Contributed dashboard, profile, class discovery/filtering, sorting, booking-history, and user-flow features within a layered full-stack architecture.
- Integrated JWT authentication, password security, profile APIs, and PostgreSQL/Prisma data models across route, controller, service, and repository layers.
- Engineered concurrency-safe reservations using PostgreSQL transactions and row-level locking to prevent race-condition-driven overbooking and duplicate bookings.
- Optimized booking responsiveness through API/database latency analysis and optimistic UI; contributed to testing, Dockerization, deployment readiness, and production verification

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering)

2025-29

Campus Location: Pune | Bachelor's enrollment: B.Tech, MIT ADT University

ACHIEVEMENTS & EXTRACURRICULARS

- Campus Engagement / Leadership:** Tech Team Lead | GeekforGeeks Student Chapter, MIT ADT
